

LUXURY BEDS

WE ARE ONE THIRD OF YOUR LIFE

comfort

WITHOUT COMPROMISE

We are one third of Your life

There are few places where we spend so much of our time as in our beds. We are glad that you have decided to give as much thought as such an important place deserves.

Divian Dream beds will help you.

Your body and mind both need high-quality rest. The individual parts of a Divian Dream bed come together to form a functional whole in which each components fulfils its own task and only when combined with the use of exclusively natural materials and quality craftsmanship is it a guarantee of the perfect rest that you deserve.

Tradition, Natural Materials and Modern Technologies

The success of our beds is based combining time-tested traditional principles, the finest natural materials and modern technologies. Our beds work on the same principle as those that our ancestors slept in many decades ago. They are based on a spring system with all its advantages for a healthy and quality sleep. Just as in the past, we too believe in the positive influence of purely natural materials on our health and the quality of our sleep. The use of modern technologies, however, is essential in achieving true perfection.

We use pocket springs from non-conductive materials and of variable thickness and winding styles in order to create comfort zones in our mattresses. We also work with a patented system for attaching and connecting the more than 1000 springs that make up each of the mattresses we make.

HORSEHAIR

A traditional material that has been used in the production of textiles ever since the 9th century. This material is one of the core elements of high-quality mattresses and mattress toppers because it possesses several unique characteristics. One of the biggest problems of mass-produced mattresses is the condensation of moisture. Each of us produces an average of almost 2 dcl of sweat while sleeping without even knowing, and this is all collected inside such mass-produced mattresses. Horsehair effectively dispels moisture and prevents its condensation within our mattresses. At the same time it is also used to set the desired firmness of the mattress depending on the way it is distributed inside the mattress.

CASHMERE (CASHMERE WOOL)

Cashmere wool came to Europe at the beginning of the 19th century and, in spite of its steep price which can reach over ten times the price of regular sheep's wool, became an essential element in the production of luxury textiles. Cashmere wool has one of the finest fibre structures, while also being extremely light and warm. The cashmere used in Divian Dream mattresses and toppers comes exclusively from the hand-combed undercoat of Cashmere and Tibetan goats and ranks among the finest in the world.

DAMASK

Damask is a single-color fabric with a fine woven pattern. It got its name from the Syrian city of Damascus, where it was produced during the middle ages. Today's production usually uses a cheap version of damask fabric using synthetic fibres, but in Divian Dream's beds you will find only the finest Belgian damask that is produced exclusively to order for our company from high-quality natural fibre.

ORGANIC COTTON

In the bedding industry cotton is still one of the dominant materials in the production of bed linen thanks to its high moisture absorption capabilities. Together with horsehair cotton contributes to the dissipation of body moisture while together with wool it provides thermal comfort. Cotton production is very susceptible to attacks from a number of pests, due to which the massive use of chemicals is a regular part of the growing process. Divian Dream uses only organic cotton in its products. This cotton is certified to be grown with no synthetic chemicals, fertilizers or pesticides. It is another way our company contributes to the quality of your sleep.

WOOL

Woollen fabrics are larger in volume than other textiles thanks to its specific thermal insulation properties. What is more, the insulation works both ways. The Touareg and Bedouin tribes have long used wool clothing to protect themselves from excessive heat. Ensuring thermal comfort is also the basic task of the sheep's wool used in the hand production of Divian Dream beds. From a medical perspective natural sheep's wool is moreover classified as a hypoallergenic material. And last but not least, sheep's wool is used in the textile and furniture industries for its fire-safety characteristics, where wool significantly out-performs most artificial materials in flame suppression and self-extinguishing abilities.

WOOD

The foundations must be solid. This is true in housing as well as in beds. For the construction of the Divian Dream divans our master carvers have selected solid pine of exclusively Czech origin. It breathes well, has a high stability and contains no chemical bonding agents.

NATURAL INDIA RUBBER

The basis for the production of natural India rubber is natural latex that is collected from a tapped Pará rubber tree. The most important feature of India rubber, which makes it ideal for use in the production of beds and mattresses, is its ability to absorb and adjust to pressure while returning back to its original shape afterwards. In full accordance with our philosophy and faith in the positive influence of purely natural materials on our health and the quality of our sleep, we use only high-quality natural India rubber in the production of Divian Dream beds.

SPRINGS

Springs have been a traditional material used during the production of beds and mattresses for centuries, tried and tested by our ancestors. For their use in modern beds it was necessary to combine tradition with modern technological procedures. We here in Divian Dream use springs from non-conductive metals with various degrees of firmness, thickness and winding design. These are then placed by hand into your new mattress and bed according to an individualised methodology in order to ensure the maximum comfort while achieving the necessary support for your body while sleeping. Springs also fulfil another important role for truly healthy sleeping – the bed's ventilation. They work like a bellows, being compressed by your body as you sleep and released when you change your position, pumping fresh new air into your mattress.

silver dream

SILVER MOONLIGHT IS THE INSPIRATION BEHIND THE SILVER DREAM PRODUCT LINE

The Silver Dream mattresses are based on a traditional time-tested spring system comprised of 1160 hand-bound pocket springs. For perfect comfort and the ideal support of your body while you sleep, we put the springs in layers of a total of 11 kg of pure horsehair combined with 100% premium quality cotton. The functional harmony of these beds is ensured by a high-quality box spring base (divan) made of solid pine and a functional core of a further 780 LFK springs, which provides the ideal transfer of the weight created by your body while you sleep to the individual parts of the bed. Together with the topper mattress, this is just the right combination to provide your body with sufficient comfort for your sleep.

Silver Dream Mattresses are available in Medium and Firm versions and they can be combined with a topper mattress of your choice to create a truly perfect place for you to sleep. You will feel like you are in a fairy tale every day in a Silver Dream bed.

The combined height of the mattress, topper and divan (without legs) is 52 cm.

golden dream

THE SLEEP OF KINGS AND QUEENS

The Golden Dream product line is comprised of 58 cm of natural materials that will go to show you that you, too, can enjoy a royal sleep.

Two layers of pocket springs comprising the core of this mattress are surrounded by 19 kilograms of pure horsehair, wool and cotton of premium quality. We provide Golden Dream mattresses in Medium, Firm, Extra Firm variations together with a 6 cm-high topper for a truly royal feeling while sleeping. You can choose from a range of toppers that, just like the mattresses, are made of natural materials of premium quality. The mattresses and toppers are upholstered with a Divian Dream cover made of Belgian damask, which is made exclusively for our company. The box spring bases (divans) of the Golden Dream line are made of solid pine, furnished with LFK springs instead of the regular slats so that, together with a Golden Dream mattress, it makes a functional, mutually coactive whole to bring you royal sleep and dreams. The combined height of the mattress, topper and divan (without legs) is 58 cm.

platinum dream

WELCOME TO THE WORLD OF PLATINUM DREAM, THE TOP LINE OF MATTRESSES AND TOPPERS THAT YOU CAN ENJOY FOR YOUR REPOSE

4900 pocket springs, 14 kg of hand-sorted horsehair, 13 kg of cotton and wool of the utmost quality and 4 kg of cashmere ensure your perfect comfort.

The basis of the success of our Platinum Dream line is the unique mattress core comprised of three layers of pocket springs connected by hand. The central layer of springs ensures your divine comfort, while the lower and uppermost layers create comfort zones on both sides of the mattress. The unique core is surrounded by wool, cotton and cashmere wool of the highest quality that create a functional whole. The hand-sorted horsehair takes care of your thermal comfort during your sleep. But your body will be pampered by the uppermost mattress layer, Belgian damask produced exclusively for our company. Platinum Dream mattresses are available in 3 versions – Medium, Firm and Extra Firm.

The mattress is the heart of the bed, but it alone does not suffice to ensure your well-earned rest in accordance with our philosophy. Thus the exceptional mattresses of the Platinum Dream line are supplemented by a box spring base (divan) and topper mattress, made by hand in our workshops with the same care and attention as our mattresses.

The combined height of the mattress, topper and divan (without legs) is 66 cm.

individual

BE THE DESIGNER OF YOUR NEW BED!

We provide the know-how, natural materials, exceptional comfort and outstanding craftsmanship. You choose the design of the headboard and divan, select the cover material and colour as well as the accessories according to your wishes and dreams. Atypical dimensions are part of the Individual line, of course.

There's more?

Certainly. Each individually designed bed comes with personalized labels on both the divan and the mattress handles. Adapt your bed to fit your bedroom.

accessories

We make the wooden bed legs on order according to the customer's wishes from Canadian or natural oak, beech, pine or acacia in 15 shades of colour and a height according to the customer's specifications.
